Söll Vi-Go Vertical Cable System

The Söll Vi-Go Vertical Cable system provides the ultimate safety with continuous fall protection when climbing on fixed ladders, it meets EN353-1 Standard (and all applicable OSHA, ANSI & CSA standard).

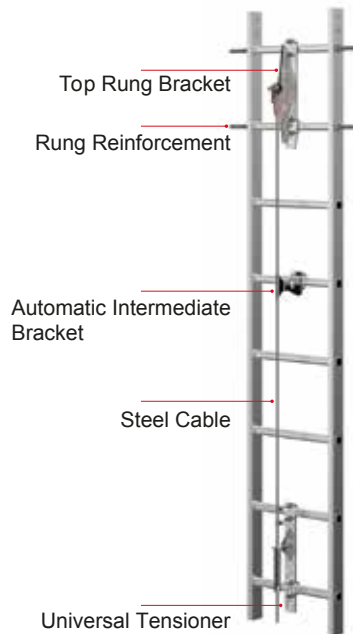

Benefits Of The System

- Accommodates up to 4 workers at a time
- Includes multiple components to perfectly adapt to the ladder
- Available with 10mm or 8mm cable, galvanized or stainless-steel components
- Meets EN, ANSI, OSHA and CSA standards (depending on the configuration)
- Söll VC500 Fall Arrester glides easily through intermediate brackets, uninterrupted hands and feet are free for climbing

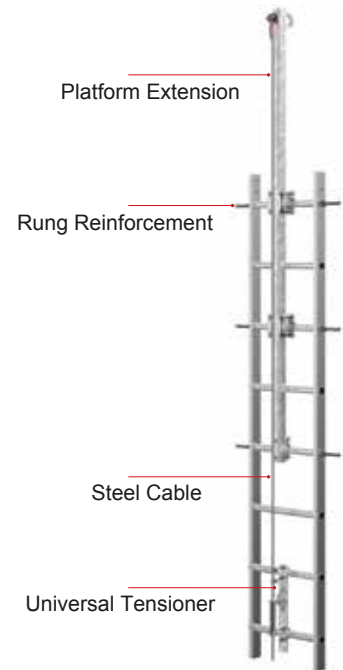

Areas Of Use

- Wind Turbines
- Telecommunications
- Utilities
- Industrial/Manufacturing Facilities
- Drilling Rigs/Platforms
- Shipbuilding
- Crane Installation
- Confined Spaces

Vertical Profile & Ladder

Product Information

Urvatikas Safety Ladder is an EN353-1:2014+A1:2017 certified fall protection system that prevents accidents and increases work efficiency. Eltel's fixed fall protection system has been enhancing working at heights for more than five decades, the system is trusted by national grades, mobile operators as well as chimney manufacturers. Turvatikas Safety Ladder is used in overhead powerlines, telecom towers and other high structures.

The System consists of safety profile (Vertical Profile B), or safety ladders (TBAll) together with climbing carriage.

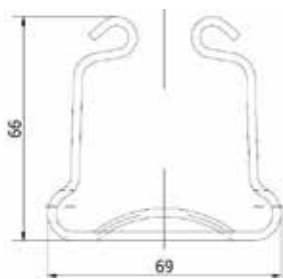

Vertical Profile B

Vertical Profile B can be used as fall arrest system in locations where there is an existing ladder, as it can be mounted on top of the ladder. Vertical Profile B is also used as a base in all Safety Ladders

Features: Delivery Lengths of 3, 5 & 6m. Holes for sleeves joints in both ends of the profile.

Weight: 4.5 kg/m

Material: Hot-dip galvanized steel or acid-proof stainless steel.

Ladder TBAll

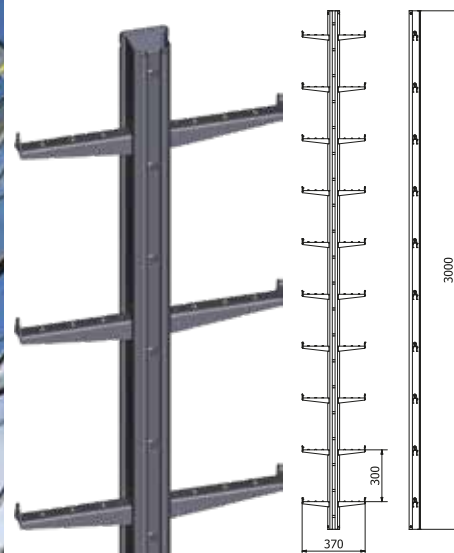

The Vertical Ladder TBAll (Ladder with support slats) is designed for use in environments lacking existing ladder steps, providing a reliable fall arrest solution.

It's innovative design ensures safety during vertical ascents and descents, allowing users to work at heights with confidence.

Features: Delivery length 3m, holes for extension joints in both ends of the profile. Welded U-profile rungs.

Weight: 6.2 kg/m

Material: Hot-dip galvanized steel or acid-proof stainless steel

System Components:

Sleeve Joint No. 71

Connector part for profile/ladder sections

Releasable Vertical Carriage Stopper No. 85 (Top)

Manually operated releasable carriage stopper

Carriage Stopper No. 89 Permanent Carriage (Top)

Stopper for vertical and horizontal profiles

Releasable Carriage Stopper With a Carriage Guide No. 852

To be installed at lower end of the vertical profile to prevent the Climbing Carriage from slipping out unintended.

Landing No. 104

Folding resting foot platform

Rung Fastener No. 10

Suitable for installations of vertical profile B onto existing ladders

Rung Fastener No. 42

Distance from the center of the tower member to the Basic clamp is 130-180 mm. Suitable for tower members with diameter 11-38 mm.

Basic Clamp No. 15

Basic fastener fastened onto Turvatikas' profile B

Universal Fastener No. 20/21/22

Versatile fastener to mount profiles and ladders onto metallic structures

Level Fastener No. 33

Used with different kinds of steel structures. Mounting plate acts as a spacer between the installation surface and the profile or ladder.

Climbing Carriage No. 940

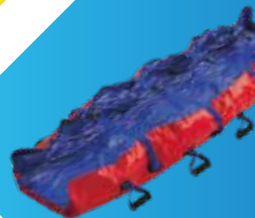

Material: Acid-proof stainless steel
Compatible with all Turvatikas Safety Ladder, Vertical Profile and Ladder. Tested according to the requirements to standard EN 353-1:2014 + A1:2017.

Climbing Carriage No. 932

Material: Acid-proof stainless steel
Compatible with all Turvatikas Safety Ladder, Vertical Profile and Ladder. Tested according to the requirements to standard EN 353-1:2014, EN353-1:2008
